

THIRD-PARTY FIELD AUDIT

InspectWin™ Audit Edition

Field audit software for organisations that audit **sites they do not own**. Certification and inspection bodies, brands auditing dealer networks, manufacturers auditing their supply base.

The visit cannot be proved • Writing it up costs more than doing it • The same finding, found again

WHAT IT DOES

01 PLAN

Schedule and allocate

Across the whole network, with automatic reminders.

02 BUILD

Author your own checklists

Unlimited, authored by your team in the browser.

03 AUDIT

Work anywhere, signal or not

Complete audit on Android with no connectivity.

04 PROVE

Evidence that speaks for itself

Where, when and by whom, sealed at capture.

05 REVIEW

Your review chain, automated

Your own reviewers. Overdue items escalate.

06 CLOSE

Report and close the loop

Report on the day it ends. Findings tracked to closure.

Distribution illustrative

29%

of audit reports in a randomised trial with an Indian state pollution control board carried readings that were not true. With random assignment and back-checks, false readings fell by about 80%.

A date is already on the calendar

ISO/IEC 17020 was revised on **27 March 2026**, adding requirements for the control of data and information. Accredited bodies transition by **27 March 2029**.

Priced per audit, not per seat.

You pay for the audits you conduct, against a minimum annual commitment. Typically 4 to 5% of what you already bill for the audit.
